Work Experience

Starburst Data Inc *(Boston MA)* *Software Engineer II* from September 2025 – Present
Working on the "connectors" team implementing fast and exact glue code between a cloud distributed SQL engine and read/write data sources like Oracle, Iceberg, and Delta Lake.

- Working in new contexts weekly to address needs of 200+ customers across 55 connectors.
- Merged 13 fixes to the open-source trino project (widely used community fork of presto).
- Spearheaded new "OpenAPI connector" to expand large enterprise customer use-cases.

ChaosSearch Inc (Boston, MA) *Software Engineer* from June 2022 – August 2025
Worked as a "core" engineer on the backend of a distributed search and analytics database.

- Rectified customer errors in data ingest, search, and aggregation of tens of terabytes of data per day on hundreds of EC2 instances using pekko streams and S3 control structures.
- Turned around "windowed monitoring query" project to provide large compute savings and restore minute by minute alerting for indexing faults.
- Opened up OEM use cases by modernizing deployment and application REST APIs.
- Connected product to platforms like Databricks, Amazon EMR with new spark format to further improve company acquisition opportunities.

Smartleaf Inc (Boston, MA) *Software Co-Op* from July 2021 – December 2021
Worked as an intern on the rails app team for a financial portfolio rebalancing company.

- Implemented exports and automations for clients with tens of billions of dollars in AUM.

Liberty Mutual Solaria Labs (Boston, MA) *Software Co-Op* from July 2021 – December 2021
Worked as an intern on the "Dwellbeing" app which rewarded homeowners for reducing risk.

- Designed RBAC system to secure and enable insights on data on internal React sites.

CloudHealth Technologies (Boston, MA) *Dev-Ops Intern* in Summer of 2017 and 2018
Worked as a high school intern in dev-ops for a large, now-acquired, cloud savings company.

- Led app-wide "Content-Security-Policy" effort to protect 3000+ customers from XSS attacks.

Education

Northeastern University (Boston, MA) *Undergraduate* from September 2018 to May 2022

- Earned a Bachelors of Science in Computer Science and Mathematics.
- Courses: Combinatorics, Dynamic Models, Stochastic Processes, Computer Systems & AI.

Awards and Accomplishments

- Graduated Valedictorian of Reading Memorial HS and Summa Cum Laude at Northeastern.
- Former Co-President of Robotics FRC Team # 4761.
- Ran 2 marathons (4:15) and all 113 miles of Brookline, MA (citystrides).

Skills and Tools

- Experienced with JVM: Scala, Java, JFRs, Heap Dumps, Class Decompilation, Java Agents.
- Framework experience in: Pekko (Akka), Spark, Terraform, Rails, React, Express, Flutter.
- Experiences in Excel, Python, PHP, C, TypeScript, JavaScript, R, Lua, Claude Code.
